1300-1400 Enjoy JEONGSEON RAIL BIKE

※ Historical background of this rail road

The natural resources South Korea has are only coal (anthracite) and limestone (raw material for cement). These underground resources are buried around north-east mountain belong to GANGWON-DO province.

In 1957, the first rail road called HAMBÆK-SEON (咸白線) was built and YEONGAM-SEON (榮巖線) was followed to be opened in 1955. But, to utilize the biggest mining areas scattered around JEONGSEON, the first part of JEONGSEON-SEON (旌善線) was built 20 Jan 1967.

And, we extended the rail road into the deeper mountain side. In 1974, the construction was finally completed as the final route of AURAJI – GUJEOLLI station was built.

Considering the economy scale of South Korea at that time, it was big news. So, even Mr. PARK JEONG-HEE president participated in the opening ceremony.

But, because current Korea became the expensive cost country, the mining cost is losing the feasibility. Therefore, the quantity of residence people and transportation demand drop until 2000.

In the end, the business operation running AURAJI – GUJEOLLI station was stopped in 2004. Since 2005, this rail road was transformed into rail bike (It was the first rail bike in Korea)

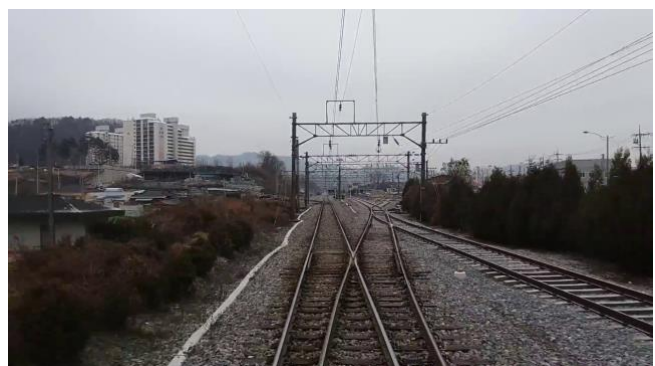

Please refer to another introduction regarding KANGWON LAND. (from Wikipedia.com)

KANGWON LAND (hangu:강원랜드) is a South Korean casino and resort company based in GANGWON-DO Province, South Korea. The Company develops abandoned mines and builds gaming and entertainment facilities. KANGWON LAND operates a number of game tables and slot machines for domestic and international customers under its gaming licenses.

GANGWON-DO province where KANGWON LAND is located, was well known as a coal mining area. It once experienced a “coal rush” when coal was used as a major national energy source during 1970 to 1980s. GANGWON-DO province had experienced devastating economic downturns since coal was replaced by gas and oil in the 90s. The Korean government tried to introduce several alternatives to revitalize the local economy, but the community repeatedly and vigorously requested a domestic casino, and it became authorized in December 1995.
